

## Atrum Coal Ltd – Job Posting

Position: Senior Mining Engineer, or Engineering Manager, or Mine Manager

Location: The Crowsnest Pass, Alberta

Main Responsibilities: Depending on the qualifications and experience, this position could be a Senior Coal Mining Engineer or Engineering Manager or Mine (Operations) Manager, to oversee the development of mining plans for the permitting, development and eventual operation of the Elan Hard Coking Coal Project (a green field open-pit coal mine) in the Crowsnest Pass area, Alberta. There is a great potential for the role to rapidly grow into an overall mine operational executive as the project progresses and company grows.

Qualifications: A mining engineer with hands-on experience in long-term and mid-term mining planning, with strong leadership and management skills. Western Canada met coal engineering or operational experience is definitely an asset.

The Project: A world class hard coking coal development with large JORC Resources already defined, anticipated multi-million tonnes per year of production of top tier HCC for the export market. The environmental baseline study is underway, with Impact Assessment and Pre-Feasibility Study to be completed in 2020.

The Company: Atrum Coal is a public company listed on the Australian Stock Exchange (ASX: ATU), well funded for exploration and development with a substantial institutional shareholder base. We offer an industry competitive salary plus significant share-based compensation. Candidates are invited to submit resume in confidence to [hr@atrumcoal.com](mailto:hr@atrumcoal.com)
